High Availability

Sprocket Networks operates secure, fault tolerant data centers designed to provide 100 percent uptime for your business applications and IT infrastructure. Outsourcing the maintenance and management of these complex systems to our professional staff enables you to reap the benefits of world-class facilities with minimal investment of capital and manpower. Our mesh network of Internap and Savvis with full BGP routing and redundancy providers over 200 mbps of bandwidth for our customers.

In 2000, an expert telecom development team carefully renovated the Federal Reserve Bank of Dallas, taking advantage of its inherent security features. Our data center offers maximum connectivity, and robust redundant power and AC.
