

Managed Data Center

Mont1 Data Center

Mission Critical

Sprocket Networks

Highly Robust

High Availability

Sprocket Networks operates secure, fault tolerant hosting facilities designed to provide 100 percent uptime for your business applications and IT infrastructure. Outsourcing the maintenance and management of these complex systems to our professional staff enables you to reap the benefits of world-class facilities with minimal investment of capital and manpower. Our mesh network with full BGP routing and redundancy provides over 2gbps of bandwidth for our customers.

Our data center offers maximum connectivity, security, and robust redundant power and AC.

DATA CENTER SPECIFICATION SHEET

Building Information	
Floors:	One (1) Story
Flood Zone:	No
Seismic:	Zone 1
Floor Loading:	150 lbs/sf
Clear Height:	9 feet
Security:	Manned security. Biometric, Card access required for entry Video surveillance and recording
Utility Power:	3,600 Kilowatt (KW) Capacity Automatic Transfer Switches
Back-Up Power:	2 3500 KW Diesel Caterpillar generators
Fuel:	5,000 gallons of on-site fuel Priority 1 contracts with fuel vendors
Data Center Information	
Data Center Space:	15,000 sf
Fiber Entry:	Redundant fiber entry points
Fire Suppression:	Advanced pre-action dry pipe multi-stage zoned system
Floor load:	150 lbs/sf
UPS Power:	2500 kVA UPS
CRAC Units	600 Tons Cooling Capacity
Water Detection	Leak Detect
Connectivity	
Network Topology	Multiple 10gbps BGP4 connections
Building Entry:	Key Card Access
Carrier Neutral:	Yes
